Life Cycle of a Butterfly

Follow the arrows to see how a butterfly grows and changes.

1. Egg: A butterfly lays tiny eggs on a leaf.

2. Caterpillar: A caterpillar (larva) hatches and eats and grows.

3. Chrysalis: The caterpillar makes a chrysalis (pupa) and changes inside.

4. Butterfly: An adult butterfly comes out, dries its wings and flies.

Butterfly Life Cycle: Cut and Glue

Cut out the pictures at the bottom. Glue them in order from 1 to 4.

The diagram illustrates a four-step process. It consists of four rounded rectangular boxes, each with a dashed border and a light gray background. The boxes are numbered 1, 2, 3, and 4 from left to right. Between each pair of adjacent boxes, there is a right-pointing arrow (→) indicating the flow from one step to the next.

Write the name of each stage on the lines.

The image displays four sequential stages of a butterfly's life cycle, each within a dashed rectangular frame. Stage 1 shows a green leaf with a cluster of five yellow eggs. Stage 2 shows a green caterpillar with a black dot on its back, resting on a green leaf. Stage 3 shows a green chrysalis hanging from a brown horizontal line. Stage 4 shows a butterfly with orange wings and a yellow body, with black markings on its wings.
