

Name: _____

Date: _____

Adding Like Fractions

Add or subtract. The denominators are the same, so only the numerators change.

1. $\frac{1}{7} + \frac{4}{7} = \frac{\boxed{}}{\boxed{}}$

2. $\frac{3}{8} + \frac{2}{8} = \frac{\boxed{}}{\boxed{}}$

3. $\frac{2}{3} + \frac{1}{3} = \frac{\boxed{}}{\boxed{}}$

4. $\frac{3}{11} + \frac{1}{11} = \frac{\boxed{}}{\boxed{}}$

5. $\frac{3}{6} + \frac{2}{6} = \frac{\boxed{}}{\boxed{}}$

6. $\frac{3}{7} + \frac{4}{7} = \frac{\boxed{}}{\boxed{}}$

7. $\frac{9}{10} + \frac{1}{10} = \frac{\boxed{}}{\boxed{}}$

8. $\frac{3}{8} + \frac{3}{8} = \frac{\boxed{}}{\boxed{}}$

9. $\frac{1}{11} + \frac{7}{11} = \frac{\boxed{}}{\boxed{}}$

10. $\frac{4}{6} + \frac{1}{6} = \frac{\boxed{}}{\boxed{}}$

11. $\frac{1}{8} + \frac{7}{8} = \frac{\boxed{}}{\boxed{}}$

12. $\frac{4}{11} + \frac{7}{11} = \frac{\boxed{}}{\boxed{}}$

13. $\frac{2}{8} + \frac{2}{8} = \frac{\boxed{}}{\boxed{}}$

14. $\frac{3}{8} + \frac{3}{8} = \frac{\boxed{}}{\boxed{}}$

15. $\frac{2}{8} + \frac{4}{8} = \frac{\boxed{}}{\boxed{}}$

16. $\frac{1}{3} + \frac{2}{3} = \frac{\boxed{}}{\boxed{}}$

Adding Like Fractions (Answer Key)

Add or subtract. The denominators are the same, so only the numerators change.

1. $\frac{1}{7} + \frac{4}{7} = \frac{\boxed{5}}{\boxed{7}}$

2. $\frac{3}{8} + \frac{2}{8} = \frac{\boxed{5}}{\boxed{8}}$

3. $\frac{2}{3} + \frac{1}{3} = \frac{\boxed{3}}{\boxed{3}}$

4. $\frac{3}{11} + \frac{1}{11} = \frac{\boxed{4}}{\boxed{11}}$

5. $\frac{3}{6} + \frac{2}{6} = \frac{\boxed{5}}{\boxed{6}}$

6. $\frac{3}{7} + \frac{4}{7} = \frac{\boxed{7}}{\boxed{7}}$

7. $\frac{9}{10} + \frac{1}{10} = \frac{\boxed{10}}{\boxed{10}}$

8. $\frac{3}{8} + \frac{3}{8} = \frac{\boxed{6}}{\boxed{8}}$

9. $\frac{1}{11} + \frac{7}{11} = \frac{\boxed{8}}{\boxed{11}}$

10. $\frac{4}{6} + \frac{1}{6} = \frac{\boxed{5}}{\boxed{6}}$

11. $\frac{1}{8} + \frac{7}{8} = \frac{\boxed{8}}{\boxed{8}}$

12. $\frac{4}{11} + \frac{7}{11} = \frac{\boxed{11}}{\boxed{11}}$

13. $\frac{2}{8} + \frac{2}{8} = \frac{\boxed{4}}{\boxed{8}}$

14. $\frac{3}{8} + \frac{3}{8} = \frac{\boxed{6}}{\boxed{8}}$

15. $\frac{2}{8} + \frac{4}{8} = \frac{\boxed{6}}{\boxed{8}}$

16. $\frac{1}{3} + \frac{2}{3} = \frac{\boxed{3}}{\boxed{3}}$
