

Name: _____

Date: _____

Improper Fractions to Mixed Numbers

Change improper fractions to mixed numbers, and mixed numbers to improper fractions.

1. $\frac{7}{3} = \square \frac{\square}{\square}$

2. $\frac{11}{8} = \square \frac{\square}{\square}$

3. $\frac{24}{5} = \square \frac{\square}{\square}$

4. $\frac{28}{6} = \square \frac{\square}{\square}$

5. $\frac{5}{2} = \square \frac{\square}{\square}$

6. $\frac{5}{3} = \square \frac{\square}{\square}$

7. $\frac{9}{2} = \square \frac{\square}{\square}$

8. $\frac{21}{8} = \square \frac{\square}{\square}$

9. $\frac{3}{2} = \square \frac{\square}{\square}$

10. $\frac{11}{3} = \square \frac{\square}{\square}$

11. $\frac{8}{3} = \square \frac{\square}{\square}$

12. $\frac{20}{8} = \square \frac{\square}{\square}$

13. $\frac{26}{8} = \square \frac{\square}{\square}$

14. $\frac{29}{7} = \square \frac{\square}{\square}$

15. $\frac{12}{5} = \square \frac{\square}{\square}$

16. $\frac{17}{5} = \square \frac{\square}{\square}$

Improper Fractions to Mixed Numbers (Answer Key)

Change improper fractions to mixed numbers, and mixed numbers to improper fractions.

1. $\frac{7}{3} = 2 \frac{1}{3}$

2. $\frac{11}{8} = 1 \frac{3}{8}$

3. $\frac{24}{5} = 4 \frac{4}{5}$

4. $\frac{28}{6} = 4 \frac{4}{6}$

5. $\frac{5}{2} = 2 \frac{1}{2}$

6. $\frac{5}{3} = 1 \frac{2}{3}$

7. $\frac{9}{2} = 4 \frac{1}{2}$

8. $\frac{21}{8} = 2 \frac{5}{8}$

9. $\frac{3}{2} = 1 \frac{1}{2}$

10. $\frac{11}{3} = 3 \frac{2}{3}$

11. $\frac{8}{3} = 2 \frac{2}{3}$

12. $\frac{20}{8} = 2 \frac{4}{8}$

13. $\frac{26}{8} = 3 \frac{2}{8}$

14. $\frac{29}{7} = 4 \frac{1}{7}$

15. $\frac{12}{5} = 2 \frac{2}{5}$

16. $\frac{17}{5} = 3 \frac{2}{5}$
