

Days in Each Month

With the day-of-year number for the 1st of each month

Month	Days	1st = day (2027)	1st = day (2028, leap)
January	31	1	1
February	28 (29 in leap years)	32	32
March	31	60	61
April	30	91	92
May	31	121	122
June	30	152	153
July	31	182	183
August	31	213	214
September	30	244	245
October	31	274	275
November	30	305	306
December	31	335	336

Remember the month lengths

"Thirty days hath September, April, June and November. All the rest have thirty-one, except February alone, which has 28 days clear and 29 in each leap year."

Days between two dates

Subtract the day-of-year numbers when both dates are in the same year. Example: from March 1, 2027 (day 60) to July 4, 2027 (day 185) is 125 days.
